
What is Tesseract system?

Tesseract is **an optical character recognition engine for various operating systems**. It is free software, released under the Apache License. Originally developed by Hewlett-Packard as proprietary software in the 1980s, it was released as open source in 2005 and development has been sponsored by Google since 2006.

What is Tesseract used for?

Tesseract is an open source optical character recognition (OCR) platform. OCR **extracts text from images and documents without a text layer and outputs the document into a new searchable text file, PDF, or most other popular formats.** 25-May-2022
